

KS4 Year 10 Food Preparation & Nutrition Vocabulary List

Functional Properties - Thinking about each ingredient, what does the ingredient actually do?

Chemical Properties - How does it do it? What makes it happen?

Investigation - the action of investigating something or someone; formal or systematic examination or research, for example the impact of changing the type of flour used in a recipe.

Hypothesis - Write a prediction about what you think will happen.

Results – The outcomes for a variety of tests, these can be shown through photos, graphs, tables and charts.

Variable – the thing that you will change?

Dependent Variable – the result that you will measure

Control Variable – A variable which must be kept the same so that the result of the experiment is not affected.

Valid Test - Does the test measure the concept that it's intended to measure?
